Absolute Maximum Ratings

Parameter	Rating	Notes
Storage temperature (VCSEL)	-40 to 125 °C	
Operating temperature (VCSEL)	-20°C to 50 °C	
Lead solder temperature	260°C, 10 seconds	
CW current (VCSEL)	12 mA	(Note 1)
Laser reverse voltage	5 V	(Note 2)

Note 1: The maximum CW laser current in the Absolute Maximum Ratings is valid for the operating temperature noted at the top of this table; however, the maximum CW laser current decreases with increasing temperature. Contact Vixar for maximum CW laser current values at other temperatures.

Note 2: For details refer to the Vixar Application Note "VCSEL EOS/ESD Considerations and Lifetime Optimization".

Stresses beyond those listed under Absolute Maximum Ratings may cause permanent damage to the device. These are stress ratings only. Functional operation of the device at these or any other conditions beyond those indicated for extended periods of time may affect device reliability.
