Technical Supply Chain Manager

About Us: Vixar is a subsidiary of Osram Opto Semiconductor. Vixar manufactures short wavelength (660nm-1000nm) VCSEL-based optical components and subassemblies for sensor and device applications within the biomedical, industrial, office product, automotive and consumer industries.

This could be your opportunity to join the exciting technology industry in a fast-paced, challenging environment!

We offer a unique opportunity to make a significant contribution to our growing company. For more information, please visit us at www.vixarinc.com.

Qualifications:

Vixar is seeking an experienced product development professional to help drive growth of the company. We are looking for candidates with the following attributes:

- Bachelor's Degree in engineering or similar technology disciplines.
- 5-7 years of experience in Supply Chain Management, Business Administration, or similar disciplines.
- Experience with international purchasing and sourcing including ability to interact and work with teams which are geographically dispersed.
- Semiconductor industry experience preferred.
- Excellent oral and written communication skills.
- Strong attention to detail and works with a high degree of accuracy.
- Highly organized and flexible.
- Able to multitask and meet changing deadlines.
- Self-directed and able to complete multiple projects with limited supervision.

Job Description:

This position is responsible for managing all activities with Vixar's contract manufacturers. In our contract manufacturing model, our suppliers are key to our growth and success. The person in this role will be responsible for working with our assembly and packaging suppliers, both domestic and international, to ensure delivery of our products.

- Manage production and development activities at Vixar's microelectronic contract manufacturing suppliers.
- Manage new product introductions through the supply chain (prototype / R&D to preproduction to high volume manufacturing).
- Source and qualify new suppliers for optical and electronic components.
- Develop total cost reduction strategies and implement cost reduction programs.
- Negotiate pricing, terms, and schedules with strategic suppliers.
- Manage materials and continuous material supply flow.
- Manage supplier development through ongoing supplier audits, scorecard implementation, and corrective action processes.
- Participate in regular supplier meetings and manage action items to closure.
